

# Tokun — Razorpay Route Activation Guide

Scope: Steps to request and activate Route on an existing Razorpay account, and the documents needed — including what's already covered by prior account KYC and what's new specifically for Route.

## 1. Where to Start — Inside the Dashboard

**Step 1.** Log in to [dashboard.razorpay.com](https://dashboard.razorpay.com) with the existing Tokun business account.

**Step 2.** In the left sidebar, go to **Payment Products** → **Route**.

**Step 3.** Click to enable/request Route. One of two things will happen:

- It activates directly for **Test Mode** (no documents needed) — you can generate test keys and start building immediately.
- It shows an eligibility/declaration form — in that case, proceed to Section 2 below before Test/Live access is granted.

**Step 4 (alternative path).** If Route isn't visible under Payment Products, or the dashboard directs you to compliance, watch for an email from [routepriority@razorpay.com](mailto:routepriority@razorpay.com) — reply to it with the documents from Section 2.

Alternatively, raise a request manually: **Dashboard** → **Account & Settings** → **Support Tickets** → "+ Raise New Query" → select a Route-related topic → attach documents.

## 2. Documents Required — What's New vs. What's Already Done

**Already covered — do not resubmit:** Company PAN, address proof, Certificate of Incorporation / business registration, authorized signatory's personal KYC (PAN + Aadhaar/Passport), and bank account details. These were part of your original Razorpay merchant account activation and apply across all Razorpay products (Payment Gateway, Route, RazorpayX) — Route does not ask for these again.

**New — specific to Route, must be submitted separately:** Route has its own eligibility check under RBI's September 2025 Payment Aggregator guidelines. This is unrelated to your original account KYC and must be submitted fresh, regardless of business type (Individual or Organization).

### 2.1 Turnover Proof (submit whichever applies)

| Condition                                          | Document to submit                     |
|----------------------------------------------------|----------------------------------------|
| Domestic turnover exceeds ₹40 Lakh in FY25 or FY26 | GST-3B returns for the qualifying year |
| Export turnover exceeds ₹5 Lakh in FY25 or FY26    | Bank-issued FIRC certificate           |

|                                                                      |                                                                |
|----------------------------------------------------------------------|----------------------------------------------------------------|
| GST-exempt, or first year of operation with no GST returns filed yet | Self-declaration letter confirming turnover (see format below) |
|----------------------------------------------------------------------|----------------------------------------------------------------|

## 2.2 Use-Case Declaration — "Payer-Payee Transparency" (always required)

A written confirmation stating that the linked accounts (your sellers) directly provide goods/services to the end customer — this is how Razorpay/RBI verify that Route is being used for a genuine marketplace split, not to disguise fund flows.

## 2.3 Document Format Rules

- Self-declarations and use-case letters must be on **company letterhead**.
- Must include **date, signature, and company stamp/seal**.
- Signed by the same **authorized signatory** already on record from account KYC — no new signatory KYC needed.

## 3. Individual vs Organization — Any Difference in What's Asked?

|                      | Individual (Proprietor)                                         | Organization (Company/LLP)                                    |
|----------------------|-----------------------------------------------------------------|---------------------------------------------------------------|
| Turnover proof       | GST-3B under personal/proprietorship GSTIN, or self-declaration | GST-3B under company GSTIN, or self-declaration on letterhead |
| Use-case declaration | Signed by the proprietor                                        | Signed by the authorized signatory, on letterhead             |
| Extra step           | None                                                            | None — same process, just formalized on letterhead            |

There is no separate document type for Organizations — only the formality (letterhead, company stamp) differs. The underlying ask (turnover proof + use-case declaration) is identical.

## 4. Submission & Review Timeline

1. Reply to the [routepriority@razorpay.com](mailto:routepriority@razorpay.com) compliance email (unmanaged accounts) with all documents attached — or raise a Support Ticket from the dashboard if no email has arrived yet.
2. If you have a dedicated Razorpay account manager (managed account), send documents to them directly instead.
3. Razorpay reviews the submission — **expected turnaround: 5 to 7 business days**.
4. You'll be notified by email once approved. Route becomes active on your account (Test Mode immediately usable; Live Mode payouts require your account to already be KYC-activated for live payments).

## 5. Quick Checklist

1. Log in → Payment Products → Route → check if it unlocks directly or asks for documents.
2. If asked: gather GST-3B / FIRC (or prepare a self-declaration if neither applies yet).

3. Draft the Payer-Payee Transparency use-case letter, on letterhead, signed by the authorized signatory.
4. Send both to [routepriority@razorpay.com](mailto:routepriority@razorpay.com) or via a dashboard Support Ticket.
5. Wait 5–7 business days for approval.
6. Once approved, generate Route API keys (Test Mode first) and begin integration.

---

Based on Razorpay's publicly documented Route FAQs and RBI Payment Aggregator guidelines (September 2025) as of early August 2026. Exact document requirements and turnaround times can change — reconfirm with Razorpay support ([routepriority@razorpay.com](mailto:routepriority@razorpay.com)) before submission if in doubt.
